

## PS Energy Group to Help Airports Go Green and Save Green

[etrac™](#), a division of [PS Energy Group, Inc.](#), has added [CI<sup>2</sup> Aviation, Inc.](#) to its growing list of channel partners to share the eco-benefits and cost savings of remote tank monitoring with North America's airports.

CI<sup>2</sup> Aviation, a leading aviation management and technology solutions provider specializing in air traffic control, will now offer PS Energy Group's [etrac-TM™](#) (Tank Monitoring) solution to help North America's airports protect the environment and save money.

"We're working with CI<sup>2</sup> Aviation to expand PS Energy Group's wireless and green product line to help airports monitor their worldwide aviation fuels and other liquid inventories from anywhere with a few simple keystrokes," said Livia Whisenhunt, president, CEO and founder of PS Energy Group.

[etrac-TM™](#) eliminates the need to physically check tank levels and can help detect leaks as well as reduce the environmental impact of operations. Customers can detect real-time changes in their storage tanks from their cell phones or computers.

"CI<sup>2</sup> Aviation can help airport facilities increase productivity and reduce emissions because PS Energy Group's [etrac-TM™](#) allows you to instantaneously determine fluid levels without driving to each site to check storage tanks," said Andrella Kenner, president of CI<sup>2</sup> Aviation.

### About [PS Energy Group, Inc.](#)

PS Energy Group, Inc. ([www.psenenergy.com](http://www.psenenergy.com)) is a privately-owned company that offers a full range of energy and transportation products and services. The [fuel management program](#) provides access to more than 200,000 fueling stations across the United States, including alternative fuels, in addition to customer-owned sites.
